

Jaiden Stanford

Fall 2023

Capstone - Electronic Art

Department of Art and Art History

Artist Statement:

Every artist has their own style when it comes to creating and expressing themselves through their work. Some people like the physical hands-on aspect of creating and others like me enjoy creating with technology and in a digital format. As my portfolio has shaped itself into what it is today, it took a lot of trial and error. Lots of time and effort has gone into creating my work and it means everything to me, my portfolio is a small reflection of who I am as a creative and I would say it will forever shape into a new format because I am always looking to explore new ways in creating and enhancing my skill list. The process of creating work just depends on the project, but I always start off with a "story board" aspect on paper to envision what I want to accomplish for the final aspect.

My work is everything as stated before it's a small reflection of who I am as a person, but as a creative it shows what I am passionate about and what I love doing. My medium is anything with a camera and sitting down and editing, so digital content creation. I really do enjoy the feeling of capturing a moment in time and history that only happens once but will forever be remembered and documented.
