Capstone – Photo Image Making

Department of Art and Art History

Artist Statement:

I am a Colorado based Photographer and Graphic Designer currently in the process of graduating from Colorado State University with a Bachelors of Fine Arts with a concentration in Photo Image Making. I am interested in both expressive abstract photography and studio portraiture.

In this body of work I aimed to use a combination of studio portrait photography and abstract photographic composites to portray personal expression. I interviewed the subject of each portrait to find something that is meaningful to them personally and created an abstract based off of that interview. Each abstract has a concept it is trying to express and some of them even depict an object that is personally meaningful to the subject of the portrait above.
