Capstone - Graphic Design

Department of Art and Art History

Artist Statement:

As a graphic designer, I employ a variety of artistic mediums and techniques to create distinctive and visually engaging designs. My designs are a reflection of the complexities inherent in the human experience. From exploring psychological themes to addressing societal issues, my creative process delves into the intricate interplay between language and imagery. Through this fusion, I aim to create works that resonate deeply with viewers, provoking thought and transcending conventional boundaries.
